FILIP SWIERCZYNSKI

Software Engineer · Angular, TypeScript & AWS

AWS Certified Solutions Architect – Associate

Warsaw, Poland | 730 994 507 | filipsdev@gmail.com | LinkedIn | filipsw.com

SUMMARY

Software engineer with 5+ years building production Angular and TypeScript applications for enterprise clients including Disney, BlackRock and Shopify. AWS Certified Solutions Architect who also builds and runs the infrastructure behind the frontend, with Terraform and CI/CD. Owns features end to end, from reactive UIs (RxJS, Signals) in Nx monorepos to .NET APIs and release pipelines, and mentors other engineers.

PROFESSIONAL EXPERIENCE

Software Engineer **06/2024 – Present**

Aptean · Wrocław, Poland

- Upgraded the team's Nx monorepo from Angular 16 to 21 (Nx migrations plus manual refactoring of 20+ files), moving the product onto a supported version with Signals and standalone components.
- Deliver MES/ERP features end to end (entity catalogues, hierarchical trees, audit questionnaires, rating systems): from Figma designs and RxJS/Signals state to the .NET (C#) REST endpoints behind them, covered by Jest unit tests.
- Mentored 3 engineers and review pull requests; wrote technical documentation and lint scripts that enforce code standards in the staging pipeline.
- Own dependency security for the monorepo: triage npm audit advisories and ship verified upgrades so CI stays unblocked without regressions.
- Coordinate releases of 4 interdependent projects on Azure DevOps (version bumps, git tags, dependency-ordered pipeline runs); diagnosed a stale-image issue on Kubernetes (AKS) and fixed it with a pipeline stage that restarts the Keycloak pods after each build.

Software Engineer **07/2023 – 05/2024**

Providius · Ontario, Canada (remote)

- Built a real-time telemetry dashboard for Disney operations using WebSockets and RxJS, rendering hundreds of live data points with <3s anomaly detection.
- Built a reusable component library meeting WCAG 2.1 AA accessibility standards.
- Wrote runbooks and onboarding documentation that reduced new-hire ramp-up time by 30%.

Web Developer II **01/2020 – 01/2023**

Q4 Inc. · Toronto, Canada

- Delivered 40+ high-traffic investor-relations websites for clients including Shopify and BlackRock, meeting accessibility requirements.
- Built reusable TypeScript widgets consuming REST and GraphQL APIs, reused across all site templates.

CLOUD PROJECT

filipsw.com: AWS, Terraform, GitHub Actions **2026**

- Moved my portfolio from Firebase to AWS with zero downtime: private S3 behind CloudFront (OAC), ACM, Route 53, and a serverless visitor counter on Lambda and DynamoDB.
- Imported the live stack into Terraform with remote state; GitHub Actions deploys it through OIDC and a least-privilege IAM role, with no stored AWS keys.

SKILLS

Frontend: Angular (16–21), TypeScript, RxJS, Signals, Nx, WCAG accessibility, Vue 3, React

Cloud & DevOps: AWS (S3, CloudFront, Route 53, ACM, Lambda, DynamoDB, IAM), Terraform, GitHub Actions, Azure DevOps Pipelines, Kubernetes (AKS, kubectl)

Backend: Node.js, C#/.NET (working knowledge), REST, GraphQL

Practices: CI/CD, Jest, Agile/Scrum, code review, dependency security

EDUCATION & CERTIFICATION

AWS Certified Solutions Architect – Associate (SAA-C03) **2026**

Mohawk College – Software Development Diploma, Ontario, Canada **2015 – 2018**

Languages: Polish (native) · English (fluent)
